

This page is intended for reference on the process of configuring white labeled instances of the UniKey mobile credential apps for an organization. The app will be consistent with corporate-specific primary branding for the UniKey-powered solution. The customer is responsible for all information unless otherwise stated.

Please note – there is generally a day for day slip on white label mobile app related project deliverables pending UniKey’s receipt of the information below. We cannot complete the work necessary to create the mobile applications without these items.

Required Mobile Apps Assets

	Item	Description
1.1	Application icon	1536 x 1536 px, SVG format, displayed on home screen of mobile device
